

# ENCOMPASS HEALTH IS HERE FOR YOU

**While much of the country was closed, our doors have always been open. That's because we know rehabilitation is the most important part of recovery after a life-changing illness or injury. Our hospital is here to provide you with therapy and compassionate care to return you to independence.**

We know you have questions about your care. There are many uncertainties, especially when it comes to your health and safety at this time, but we are here to provide those answers. We also want to assure you that while many things have changed, our commitment to getting you better has not.

## **At Encompass Health, you are never alone**

Like all healthcare providers, we have had to change our visitation policies at this time, and we continue to make

adjustments to those policies based on CDC guidelines. Despite these changes, your primary caregiver is still an integral part of your care plan, so they will still be able to visit and take part in your recovery and return to independence.

When your loved ones can't be there, our care team will be by your side, wanting to keep you and your loved ones connected and informed every step of the way. We also are here to listen and help ease any anxieties you might have during your stay.

**HEALTH ASSESSMENTS ON ALL EMPLOYEES AND VISITORS**

**SOCIAL DISTANCING**

**MASK REQUIRED**

**CLEANING ALL THERAPY EQUIPMENT AFTER EACH USE**

## **At Encompass Health, we are committed to keeping you safe—now more than ever**

Preventing and controlling the spread of infection looks different in a rehabilitation hospital. At Encompass Health, we established infection control protocols specific to the rehabilitation hospital setting well before this global pandemic.

We have enhanced these protocols and are following CDC guidelines to ensure your safety at all times during your stay. Some of those enhanced protocols include thoroughly cleaning all therapy equipment after each use, social distancing and in-room therapy when needed. We are also requiring employees and all visitors to wear masks and are conducting health assessments on all employees and visitors before they enter the hospital.

## **At Encompass Health, our commitment to getting you back to your independence has not changed**

Your care team will design a unique plan of care specific to your goals and what you want to get back to most. Nursing staff is available around the clock and physicians visit regularly. A combination of physical, occupational and speech therapy will assist you in regaining your strength and independence.

## **At Encompass Health, we're here for you**

We hope this has helped answer some of your questions and ease any concerns you have about entering a rehabilitation hospital at this time. Your health and safety is always our top priority. Should you have more questions, please reach out to one of our rehabilitation experts at 781.348.3826 or visit our COVID-19 resource hub on our website at [encompasshealth.com/braintreerehab](https://encompasshealth.com/braintreerehab).
