

Parkinson's Foundation: Impact by State

NEW JERSEY

In New Jersey, there are an estimated **21,900 people with Parkinson's disease (PD)** who are 45 or older. The Parkinson's Foundation has invested **\$55,000** in **research** to better understand Parkinson's and to ensure **better care** for the New Jersey PD community. As of 2018, in the last 5 years:

- **200 people with PD** enrolled in the *Parkinson's Outcomes Project*, the largest clinical study of Parkinson's.
- **2 researchers** received research grants for their work to better understand Parkinson's.
- **495 health professionals** were trained to provide better care, and help close the gap in PD professional training.

We are equally committed to **educating and empowering** the PD community in New Jersey. In the last 5 years:

- **890 Aware in Care kits** prepared people for planned and emergency hospital visits.
- **7 research advocates** — people with PD and care partners — were paired with scientists to make research more effective and efficient.

Offered professional help through **2,800** calls to information specialists via our Helpline, with **790** referrals to expert care.

Helped people with Parkinson's live well, distributing **13,400** free publications.

Brought communities from New Jersey together to raise awareness for Parkinson's.

The Parkinson's Foundation makes life better for people with Parkinson's disease by improving care and advancing research toward a cure. In everything we do, we build on the energy, experience and passion of our global Parkinson's community.
