

# Memory Clinic

In Partnership with Researchers Against Dementia

## Are you or someone you love experiencing memory changes?

You may benefit from a memory evaluation through our Memory Clinic. The results can provide you and your physician with valuable information that can help preserve your quality of life and maintain independence. You will be given helpful information about caregiver and community resources.

We also provide information about volunteer research opportunities and education about joining the fight against dementia. Our research studies are at the heart of getting medicines to those who need them. Participation in research studies helps the scientific community find treatments for diseases that cause dementia and may benefit future generations. You do not have to participate in a research study to receive a Memory Clinic evaluation. All services of the Memory Clinic are free of charge. We will not bill your insurance or Medicare.
